

PARTS & MAINTENANCE MANUAL for 005-895

GRAVERSMITH®

PRIOR TO ANY SERVICE OR REPAIR FOLLOW THESE STEPS:

1. Power off machine by pressing power on/off button
2. Disconnect machine from power at the 24-volt power receptacle.
3. Turn off air compressor and shut off air supply at compressor.
4. Bleed residual air from system by depressing foot throttle.
5. Detach air hose from air supply input push-to-connect fitting

SERVICE & REPAIR

Please call GRS® or an authorized GRS® dealer to order replacement parts and for instructions on replacement. Do not attempt to service parts that must be sent to GRS® or an authorized GRS® dealer; these must be repaired or replaced by

GRS® or an authorized GRS® dealer. Servicing parts not signified as operator serviceable will void the 2-year warranty. Any part not noted as replaceable or serviceable by the operator must be sent in to GRS® or an authorized GRS® dealer for repair.

ORDER REPAIR OR REPLACEMENT PARTS

These parts are replaceable by the operator. Normal Wear and Tear, Abuse, Misuse, or Loss are not covered by warranty. See illustrations on page 2.

WARRANTY

Each GraverSmith®, including provided foot throttle, carries a full 2-year warranty covering parts and labor. Contact GRS® or an authorized GRS® dealer before returning any equipment.

These products are designed for reliable operation using most sources of compressed air. However, some air supplies contain excessive water, oil, dirt, rust, or other contaminants. The built-in filter of the engraving system is a final filter to protect against normal dirt and water. If the compressed air has excessive contaminants, install the necessary filter(s) and water trap(s) ahead of the engraving system.

Oil contamination can be gradual and subtle. If an oil residue (usually yellow or brown, sticky or liquid) becomes present in the filter bowl of the engraving system, or in the handpiece / throttle hose, the compressed air most likely contains oil or contaminants. Older oil lubricated and “silent” compressors that use internal oil are more likely to cause oil contamination. If this occurs, install a Coalescing Oil Filter (GRS® #004-730-6MM or equivalent).

NOTE: Damage caused by contaminated compressed air is not covered by the warranty.
